

Please do not change the Telephone Privacy law as we have it in Indiana. We have a good thing and don't need it watered down or fooled with. The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Let the states regulate what they want done and the Federal government should stay out of it.

I used to get 10 to 15 calls a week, now I get 2 or less and if I tell them I am on the no call list, they hang up immediately.

Please do not change the law and bow to lobbyist. What we have is good and working very well.
